

## Generalized Thermal Maturity Map

---

The “Generalized Thermal Maturity Map” of Alaska was published in paper form in 1996 as U.S. Geological Survey Miscellaneous Geologic Investigations Map I-2494 (1:2,500,000). This CD-ROM contains digital versions of the complete map, as well as its component parts as ARC/INFO files. Use the button at the right to view the PDF version (6.4 Mb) of the map (1:5,000,000). Other formats and ARC/INFO files can be found elsewhere on this CD-ROM, and are described in the file readme.txt.

Note that screen redraws and button commands may be slow due to the map's large file size.
