This map is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards. Do not use for navigation.

The beach structure/feature field data were collected using hand held GPS receivers in 1995-1998. The Gulf coast shoreline was GPS surveyed in the summer of 1997 (Hapke and Gelfenbaum, 1998). The nearshore (< 10 m water depth) and subaqueous portion of the shoreline was collected using echosounding sonar in winter/spring of 1997-1998. The black and white aerial image is from 2 of the CIR DOQQs, 1 m by 1m resolution, Jan/Feb 1994/96. The bathymetric surface model is not consistent with the other data. It was created from NOAA NOS Hydrographic Surveys taken in the 1950s and 1970s.

Map projection: UTM Zone 17, North American Datum 1983, Spheroid GRS 1980. Black dot: UTM Easting, Northing and Longitude.
